# Privacy & Consent

Guardian Angel respects your privacy. You control what is shared.

## Private Chatbot

For this prototype, up to four recent messages are temporarily processed by the team's local AI laptop over trusted Wi-Fi. They are not saved, but the laptop administrator could technically access data during processing.

## Simulated Monitoring

Track simulated heart rate, activity and sleep patterns.

## Trusted-Contact Alerts

Send limited alerts if unusual patterns are detected.

## Referral Sharing

Share pseudonymous data with counsellors (you approve each share).
